DISCLAIMER & LIMITATIONS ON LIABILITY

The Equipment utilises UVC technologies to assist with decontamination management. There are many contributing sources and causes of contamination, and they are complex and multifactorial. The efficacy and optimal performance of the Equipment will depend on a number of operator, operational and environmental circumstances beyond Finsen's control.

Accordingly, finsen cannot and does not warrant complete decontamination or the total eradication of pathogens, whether from an environment, object or device, and does not make any disease prevention or other related claims or representations. To the fullest extent permitted by law finsen expressly excludes and disclaims any such warranties, whether express, implied or statutory. By purchasing and/or using finsen equipment the customer accepts this disclaimer in full.
